I drive truck and I believe this is the best radio there is. There is the truckers channel, news, sports, weather. These help me in my profession to know what is going on around me in this unpredictable world. Also there is the comedy channel, wow, what a nice way to unwind after a gruelling day on the road. No matter what the mood for that day, I can find something of interest on xm. Regular radio does not offer me the same quality. I know when I travel what I want to listen to with xm. When driving down the road with regular radio it's just hit and miss what you get. Weather is not always available, no warnings about tornados etc. Please for the sake of people like me leave this alone. It's the best thing since sliced bread!!!!!!!!!!
